

## Spang Engineered Solutions Acquires Frost Magnetics

Pittsburgh, Pennsylvania – May 2018

Spang Engineered Solutions (SES), a business unit of Spang and Company, has acquired Frost Magnetics, located in Oakhurst, California. The purchase expands the reach of SES by providing a presence in the western United States. Frost's deep roots in the region and outstanding reputation in the industry strengthen the ability of SES to serve existing and new customers.

In addition, the Frost Magnetics team brings unique expertise in the design and manufacture of magnetic devices. Specific areas where Frost's technical strengths complement those of SES include line frequency power magnetics in compact packages; redesign for improved efficiency, both at line frequency and switching frequencies; robust design for extreme environmental conditions; and UL/CSA certifications, all of which will continue with SES.

### **About Spang and Company**

Founded in 1894, Spang & Company is a diversified manufacturing company, with product lines ranging from passive components for high frequency electronics to custom engineered power control systems. Headquartered in Pittsburgh, Pennsylvania, Spang & Company divisions have manufacturing and support facilities located worldwide. [www.spang.com](http://www.spang.com)

### **About Spang Engineered Solutions**

Spang Engineered Solutions specializes in the design and manufacture of high power switching frequency inductors and transformers. SES utilizes unique design tools, custom testing equipment and a talented group of magnetic designers to provide optimized solutions for a wide variety of applications and industries. Manufacturing locations in the United States and a wholly-owned and operated facility in China allow for quick turnaround of prototype and initial production volumes, while also being able to provide production volumes at competitive prices. ### **About Frost Magnetics**

Frost Magnetics has been designing and manufacturing custom magnetics products since 1964. Originally located in southern California and moving to Oakhurst, CA in 1997, Frost Magnetics has been known for superior design resources, high quality manufacturing, and exceptional customer service. Frost has specialized in low frequency laminated steel transformers and inductors serving the aerospace, medical, marine, electric vehicle and alternative energy industries.
